

Rogério Lucas Viana

Junior Developer / Full Stack Developer in Training

Full Stack Web Developer holding an advanced qualification in Web Application Development (DAW), specializing in the PHP (Laravel 12) and JavaScript ecosystems. Hands-on experience in maintaining production software, refactoring legacy code, and troubleshooting issues. Applied knowledge of deploying containerized environments using Docker and managing relational databases.

Technical Experience Developer Web(FCT InternShip complete) | MON EVENT SL.

February 2026 – April 2026

- **Docker & DevOps:** Orchestrated containerized PHP/MySQL environments, resolving version conflicts and ensuring production-dev parity.
- **Backend & Stability:** Enhanced system reliability by refactoring controllers and streamlining complex permission logic in Laravel 12.
- **Asynchronous Logic:** Implemented AJAX-driven features (commenting & time-tracking) and automated SMTP notification workflows.
- **UI/UX Optimization:** Refactored CSS architecture to improve visual performance, maintainability, and overall user experience.

Lead Full Stack Developer | “Biblioteca-2DAW” Project [Link Project](#)

- **Full Stack Architecture:** Engineered an end-to-end application using Laravel 12 and PHP 8.2, implementing advanced Eloquent ORM data modeling and MySQL relational structures.
- **DevOps & Deployment:** Managed full software lifecycle via Git and successfully deployed the production stack on AWS EC2 cloud infrastructure.
- **Search Engine & Data Flow:** Developed a high-performance search engine featuring advanced filtering, data persistence, and dynamic pagination for large-scale datasets.
- **Security & Auth:** Implemented a robust Multi-guard authentication system and a dedicated administrative dashboard for granular Role-Based Access Control (RBAC).
- **Frontend Performance:** Architected a modular CSS system and interactive components using Vanilla JS (Zero-dependency), ensuring maximum speed and optimized Core Web Vitals.

Skills

- **languages:**
 - JavaScript, TypeScript, PHP, Java, Python
 - HTML5, CSS3 / Sass
 - SQL, PL/SQL, XML
- **Frameworks and Library**
 - Laravel + Eloquent ORM
 - Bootstrap
 - Vanilla JS
- **Data Base**
 - MySQL, MariaDB, SQL Server
 - Microsoft sql server management studio
- **DevOps**
 - Git & GitHub
 - Docker
 - Postman
 - Nginx, Apache
- **Cloud**
 - AWS (EC2)
- **Environments / SO**
 - Windows / Linux

Education

- **Higher Technical Degree (AQF 5 Equivalent) in Web Applications Development (DAW)**
Tunivers Formación 2024 - 2026
- **Supplementary Training (Udemy):** Web Development
Complete Web Development, Modern JavaScript, Python Total (Udemy)

Languages

Spanish | Portuguese: Native Speaker (Bilingual).
English: Intermediate (B2) | Technical Proficiency.
